

ICT Infrastructure Services

CAPABILITY STATEMENT OVERVIEW

As part of Plug Smart ICT Services, we provide a wide range of cabling infrastructure solutions for commercial, industrial and institutional facilities. Design and installations include Data Centers, NOCs, Server Rooms, Premise Structured Cabling, Fiber Optics, Telecom IDF's & MDF's, Racks & Cabinets, Cable management, Enterprise Wireless, Distributed Antenna Systems, Access Control, CCTV, Audio, Intercom.

"Digital communication is dependent upon a robust and carefully installed cable infrastructure which serves as the foundation to any fast, reliable network."

-Rich Housh, Founder and CEO

ICT Infrastructure Solutions

As part of Plug Smarts integration specialties, we develop and implement design-build structured cabling systems. Correctly designed and implemented, this infrastructure provides a tremendous advantage for network performance while reducing total cost of ownership. Plug Smart generates detailed system designs & network drawings for clarity and ease of system installations which also drastically reduces downtime in diagnosing any tech support issues. With a 25 year IT Infrastructure Services track record along with our professionally trained & highly experienced Certified Master Technicians, holding some of the highest industry certifications, we stand behind our work by providing our customers with a **Lifetime Factory Warranty**.

Plug Smart provides a full range of high level support services to ensure these installed systems are operating 24/7. Services include onsite service for moves, adds and changes.

TECHNOLOGY PARTNER

Solutions

- STRUCTURED CABLING 
- FIBER OPTICS 
- ACCESS CONTROL 
- CCTV 
- VIDEO MANAGEMENT 
- INTEGRATED BAS 
- INTEGRATED LIGHTING 

ICT Infrastructure Services

- Engineering & Design-Build
- Turnkey Solutions
- Service & Support
- Performance Agreements
- Consulting Services
